

THE LOS ANGELES CENTER

Located in the center of Los Angeles' hi-tech district, the Los Angeles Center is a gateway for connectivity from the United States to Asia.

Customers have their choice of connectivity from vast array of connectivity carriers.

The Los Angeles Center, also known as 626W, is home to the [LAIIX](#) (Los Angeles International Internet eXchange) [peering](#) exchange. The explosive growth of the Chinese and Indian economies make it a key Internet exchange point for companies to increase their reach in the Pac Rim strategic business theater. In addition, 626W is zero mile distance from the One Wilshire carrier hotel. We offer dark fiber connectivity to that site.
