

TELEHOUSE EXPANDS INTO GERMANY WITH TELEHOUSE FRANKFURT

TELEHOUSE Defines Presence in Germany with 43rd Data Center in the Financial Center of Europe

New York, NY, USA – January 9, 2012 – [TELEHOUSE America](http://www.Telehouse.com), the leading provider of [dedicated data centers](#), [international Internet exchanges](#), and [managed IT services](#), announces today the opening of TELEHOUSE Frankfurt, located in the financial center and the fifth largest city in Germany. The debut of this facility is made possible by TELEHOUSE's acquisition of Germany's largest colocation and housing provider, Databurg GmbH. TELEHOUSE Frankfurt is a Tier 3 data center, which offers over 220,000 square feet of colocation space.

TELEHOUSE's newest addition to its growing portfolio of global facilities is located right in Frankfurt am Main, the largest city in the important Rhine-Main industrial region. As Germany's financial center, Frankfurt has a superb IT infrastructure and power supply, along with the highest concentration of new and relevant IT companies in the country. International businesses can count on a strategic point of presence in this secure area with scalable, redundant power and connectivity options. Customers will also have access to Europe's second largest Internet exchange, DE-CIX, with 404 ISP's and carriers from over 45 countries.

TELEHOUSE Frankfurt offers the following noteworthy features:

- IDW PS 951 certification (Germany's SAS70)
- Carrier Neutral with over 22 carriers/ISPs
- Common Colocation, Cages or Dedicated Suites
- Business Continuity Planning Center with available PC LAN workstations
- 24X7 monitoring/ surveillance with "remote hands"
- 24X7 Security with the latest features and Authorized Personnel Access
- Access to Offices, Staging and Storage space
- TIER 3 Standard with other TIER options available
- N+1 redundant power and cooling systems
- Up to 21MVA uninterruptible and emergency power
- Environmentally friendly "green" power supply
- Floor Load-bearing capacity 5 to 15 kN/sq.m.
- Gas Suppression Fire System

"TELEHOUSE makes it a priority to keep customers connected all over the globe. Expansion into Germany proves that we are committed to fulfilling the needs of our international clients by establishing a reliable data center hub right in the heart of the financial center in continental Europe," states Satoshi Adachi, Vice President of [TELEHOUSE America](http://www.Telehouse.com). "TELEHOUSE's presence in this prominent city is truly a testament to our dedication in being one of the most trusted premium data center providers in the world. Our customers' ability to utilize our services in Germany will allow their businesses to grow and expand with ours."

In 2011, TELEHOUSE opened three new facilities: [TELEHOUSE New York Chelsea](#), [TELEHOUSE Hong Kong CCC](#), and [TELEHOUSE Istanbul](#). [TELEHOUSE Frankfurt](#) is the most recent addition and the first new data center in 2012.
