Telehouse **Voltaire**

Boulevard Voltaire 137, Paris, 75011

Telehouse Voltaire

With a total colocation space of 7,000 sqm, Telehouse Paris Voltaire is one of the largest data centers in Paris. With over 100 carriers on site and as the primary location for the French Internet Exchange, France-IX, Telehouse Voltaire is also the most connected data center in Paris. As the key hub for 80% of France's live internet traffic, Telehouse Voltaire has also been the recipient of the "France Oscar Security Award" from a leading French security organization for outstanding security measures, and is continuously gaining recognition from the government, mass media and related industrial associations as a prime data center and colocation site.

Voltaire is Telehouse's second data center in Paris and opened in 1999. Telehouse's Paris data centers have 19 years' experience hosting the mission critical systems of multinational corporations including gaming/media, finance, IT service providers, telecoms companies and some of the world's most recognised luxury retail brands.
