

The rapid emergence and business impact of digital disruption and the importance of re-architecting IT infrastructure to the digital edge has required Telehouse to expand and extend its ecosystem.

Connect to the Telehouse Ecosystem and connect to CHOICE. Choice connectivity solutions that can help your business reach their goals. Data Centers, Cloud Providers, and hundreds of business partners as well as peering members make up the Telehouse Ecosystem.

Our partners such as Megaport, Epsilon, PacketFabric and our own New York International Internet Exchange (NYIIX) can lower latency, improve performance and lower costs.

### Benefits of Telehouse Cloud Interconnect:

- Fast Provisioning, Configurations and Troubleshooting
- Extend your existing infrastructure for greater efficiencies - one physical port can support up to 4,000 virtual connections
- Peer with 140+ members for reduced costs, route redundancy and lower latency

Telehouse provides 10G and 100G ports to their largest Public Peering Exchange in the Northeast.

Megaport and Epsilon for multi-cloud, cloud-enablement.

### Telehouse grants you more choice and greater flexibility when it comes to purchasing and billing:

- Flexible billing options
- Month-to-month terms
- Usage-based options

Telehouse Cloud Link which provides secure, reliable access to one or more leading public cloud services.

Packetfabric, network-as-a-service platform allows for Ethernet-based access and connectivity to 130 locations in the domestic US.
