Service Overview

Colocation

Telehouse provides three customized levels of data center privacy to ensure customers get the required security for their mission critical infrastructure.

Shared Colocation

Caged Colocation

Dedicated Suite Colocation

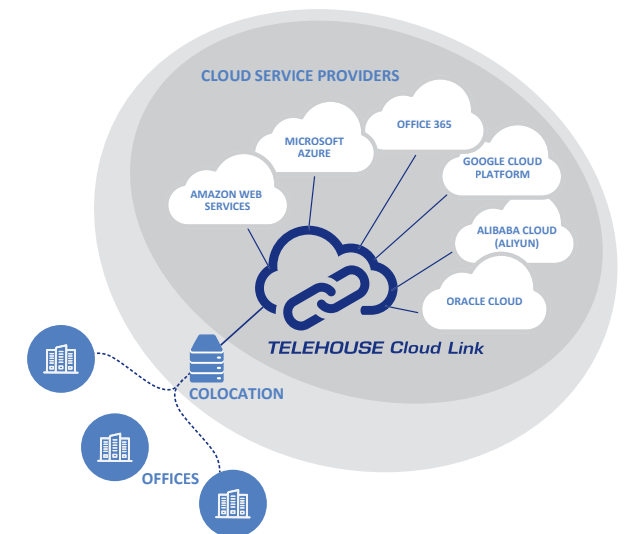

Cloud Connectivity

Telehouse Cloud Link:

Telehouse Cloud Link is a multi-cloud network provisioning service, delivering a private connection with predictable and scalable bandwidth between a customer's network and cloud services.

Available cloud providers in Telehouse*:

- Amazon Web Services
- Microsoft Azure
- Office 365
- Google Cloud Platform
- Alibaba Cloud (Aliyun)
- Oracle Cloud

* Telehouse Cloud Link service is available in our New York, London, Paris, Frankfurt and Hong Kong facilities. Services and available cloud providers differ at each facility.

Global Map

Telehouse operates over 40 data center sites around the world, delivering a consistent level of high quality service.

Our Values

Telehouse Interconnect

Telehouse Interconnect, where the world gets connected, brings together more than 3,000 business partners, including carriers, mobile and content providers, enterprises and financial services companies. This makes Telehouse a unique place to create business opportunities, now and in the future.

Cloud Interconnect

Telehouse enables many of the world’s largest private and public cloud service providers to connect seamlessly and securely to end users. It offers enterprises secure, low-latency, and cost effective connections to the cloud.

Carrier Interconnect

Our connectivity with 800+ partners makes us the ideal choice for companies that cannot compromise on latency.

Telehouse is also renowned for hosting some of the world’s most important hubs: LINX, NYIIX, France IX, JPIX, DE-CIX, HKIX, playing a key role in supporting the growth of interconnectivity.

Global Standard

The Telehouse Global Guidelines ensure that regardless of where you locate your infrastructure, you will receive the highest level of certification, specification and customer service.

We hold over 300 technical specifications with which our collective purpose-built data centers comply.

Global History

1989

First purpose-built Telehouse data center opens at the Teleport, New York, USA.

About our Parent Company, KDDI Corporation

KDDI leading the way in Global Business

KDDI, a Fortune Global 500 company, is one of Asia's largest telecommunications providers, with approximately US\$48 billion in annual revenue and a proven track record extending over many years and around the world.

Since its establishment in 1953, it has expanded its presence into 28 countries and 62 cities, with over 100 offices around the world supporting the success of its international customers through its high quality services. KDDI's mobile telephone brand "au" has achieved significant market share in Japan, one of the world's most comprehensive communications markets.

KDDI's relationship with over 600 carriers worldwide enables it to provide high-quality international network services in over 190 countries. Its exciting ventures, built on extensive experience, include investment in the "South-East Asia Japan Cable 2", which connects 11 locations in 9 countries and territories in Asia. Moreover, as the world moves toward the age of IoT and 5G, KDDI is taking steps to promote IoT business, such as connected cars, support for companies engaged in global business, and the creation of new value for our society.

Request a Site Tour

Visit our facilities and see for yourself why we are the trusted brand in data centers.
